

### 3. LOGIN

User login is required to control access to ELVIS and to provide the user with the capability to build and recall custom maps (100 custom maps are allocated per user). The system administrator assigns user accounts, which includes user name, login, password, parent command, telephone, and email address.

The screen below is the initial ELVIS login window. A user enters a login name and a password, and then clicks on the OK button. The use of the [ENTER] and [TAB] keys to move the cursor to the Password field and activate the OK button is dependent on the particular browser.

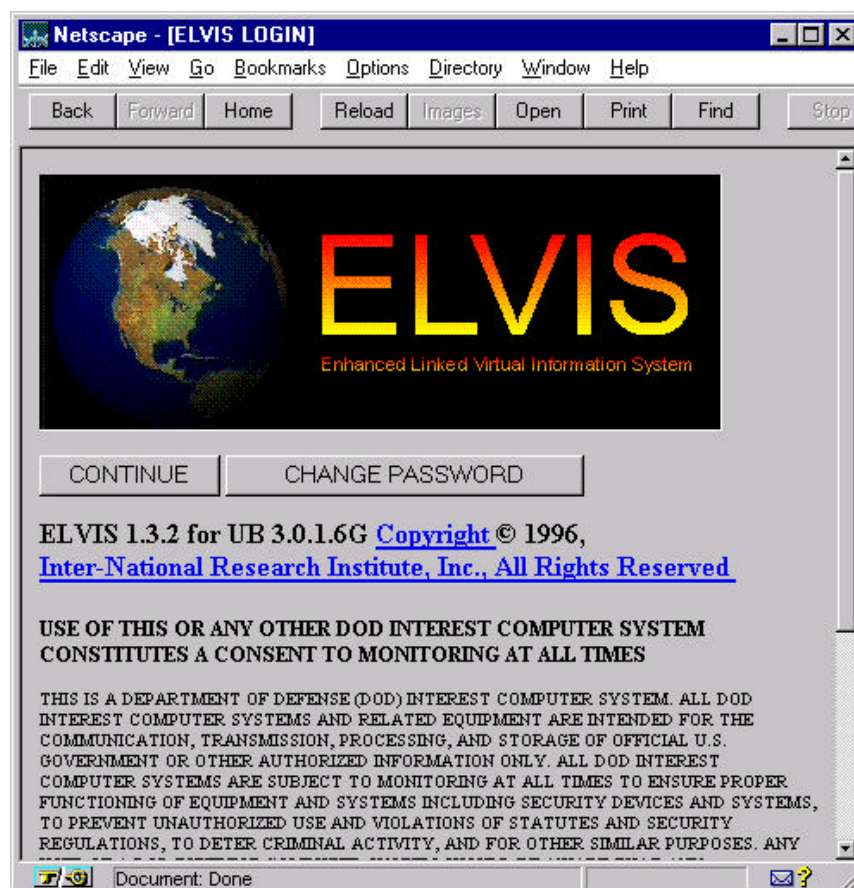

The screenshot shows a dialog box titled "Username and Password Required". Inside the dialog, the text "Enter username for ELVIS at MAIN\_COMM:9000:" is displayed. Below this text are two input fields: "User Name:" and "Password:". At the bottom of the dialog are two buttons: "Cancel" and "OK".

Following successful login, the following copyright/disclaimer screen is presented. An option is provided to change the user's password. Select CONTINUE to access the Virtual Command Center (VCC).

**Enhanced Linked Virtual Information System (ELVIS) Version 1.3.2  
User Manual**

---

If the user decides to change the password, then the following screen is presented. Upon selecting the CHANGE option, follow the instructions to re-login to ELVIS.

A screenshot of a Netscape browser window titled "Netscape - [Change ELVIS Password]". The address bar shows "Document: Done". The main content area contains instructions: "Type your new password exactly the same in both fields below. This will reduce the possibility of submitting a password with errors." Below this are two text input fields. The first is labeled "New Password:" and the second is labeled "New Password (again):". Below the input fields are two buttons: "CHANGE" and "RESET".
